PROFESSIONAL SUMMARY

Software Engineer with 2+ years shipping and operating production web applications across 20+ live sites. Owns projects end-to-end, from technical scoping through deployment, monitoring and maintenance on Vercel, with hands-on exposure to Docker, Linux, Git/GitHub and GCP. Builds automated verification into delivery, using Playwright to validate AI-generated code against specifications before handoff. Uses AI code assistants (Claude Code) daily for well-defined tasks while reviewing output for correctness and team standards. Now growing into DevOps: infrastructure as code, CI/CD pipelines and cloud platforms.

EXPERIENCE

Studio Enova *Mar 2026 – Present*
Lead Webflow Developer, Webflow (Contract, full-time) *Jun 2026 – Present, Remote*

- Built automated verification with Playwright to validate MCP/AI-generated components against Figma specifications before handoff.
- Own technical direction and per-project architecture decisions for client builds; mentor 2 developers through code review and shared standards.
- Led delivery of 2 reusable component libraries (design systems) and the client sites built on top of them.
- Primary engineering liaison to the design team, translating requirements into documented build specs.

Webflow Developer, Webflow (Contract, full-time) *Mar 2026 – Jun 2026, Remote*

- Raised Lighthouse accessibility scores 30% through audits with axe DevTools and targeted fixes.
- Built 20+ reusable components in vanilla JavaScript and structured CSS, tested cross-browser.

E3 Studio *Feb 2025 – Present*
Co-founder & Software Engineer *Remote*

- Co-founded a 3-person studio and owned 3 production Next.js sites end-to-end, from scoping to deployment and ongoing maintenance on Vercel.
- Built the API layer that fetches and shapes content from Contentful (headless CMS), and optimized image delivery through Cloudinary.
- Monitor production performance with Lighthouse (90+ SEO) and Google Search Console; two sites rank on Google's first page organically for their main local searches.
- Built typed, reusable React/TypeScript components shared across all three sites to speed up delivery.

LeadVenture *Mar 2025 – Mar 2026*
Frontend Developer I *Remote*

- Maintained 20+ production websites on a shared multi-site platform, each serving 1,000+ monthly visitors.
- Partnered with QA to catch cross-browser regressions before each release.
- Refactored shared UI into a reusable component library, reducing code duplication by 25% across the codebase.
